

# Author Index Volume 1 (1983)

(The issue number is given in front of page numbers)

**Andress, H.-J.**, The first 10 years of a working career: An illustration of event-history analysis with West German mobility data <sup>2</sup> (2) 111-135

**Bayne, C.K., J.J. Beauchamp, V.E. Kane and G.P. McCabe**, Assessment of Fisher and logistic linear and quadratic discrimination models <sup>2</sup> (4) 257-273

**Beauchamp, J.J.**, see **C.K. Bayne** (4) 257-273

**Brown, M.B. and C. Fuchs**, On maximum likelihood estimation in sparse contingency tables <sup>1</sup> (1) 3- 15

**Brown, M.B. and R.A. Wolfe**, Estimation of the variance of percentile estimates <sup>1</sup> (3) 167-174

**Chavas, J.-P.**, see **R.F. Ziemer** (2) 75- 83

**Elliott, A.C.**, see **W.A. Woodward** (3) 191-200

**Flury, B.N.**, Some relations between the comparison of covariance matrices and principal component analysis <sup>2</sup> (2) 97-109

**Francis, I.S.**, A survey of statistical software <sup>2</sup> (1) 17- 27

**Fuchs, C.**, see **M.B. Brown** (1) 3- 15

**Games, P.A. and G.S. Wolfgang**, A review of six multifactor tests for homogeneity of spread <sup>2</sup> (1) 41- 52

**Gibbons, D.I. and G.C. McDonald**, Illustrating regression diagnostics with an air pollution and mortality motel <sup>2</sup> (3) 201-220

**Gokhale, D.V.**, On entropy-based goodness-of-fit tests <sup>1</sup> (3) 157-165

**Huba, G.J. and A.L. Palisoc**, Computerized path diagrams on a linear printer <sup>3</sup> (2) 137-140

**Kane, V.E.**, see **C.K. Bayne** (4) 257-273

**Katz, D.**, Discrete approximations to continuous density functions that are  $L_1$  optimal (3) 175-181

**Malone, J.M. II**, A library of new capabilities in statistical computing <sup>3</sup> (2) 141-143

**McCabe, G.P.**, see **C.K. Bayne** (4) 257-273

**McDonald, G.C.**, see **D.I. Gibbons** (3) 201-220

**Nessim, S. and D.L. Preston**, A Monte-Carlo comparison of several methods for the analysis of censored survival data with treatment and covariate effects <sup>2</sup> (3) 183-190

**Onishi, H.**, A variable selection procedure for econometric models <sup>1</sup> (2) 85- 95

<sup>1</sup> Appeared in Section I (Methodology).

<sup>2</sup> Appeared in Section II (Applications and Comparative Studies).

<sup>3</sup> Appeared in Section III (Notes).

**Palisoc, A.L.**, see **G.H. Huba** (2) 137-140  
**Parrish, R.S.**, On an integrated approach to member selection and parameter estimation for Pearson distributions<sup>1</sup> (4) 239-255  
**Preston, D.L.**, see **S. Nessim** (3) 183-190

**Sheather, S.**, A data-based algorithm for choosing the window width when estimating the density at a point<sup>1</sup> (4) 229-238

**Wilson, S.R.**, Benchmark data sets for the flexible evaluation of statistical software<sup>2</sup> (1) 29- 39  
**Wolfe, R.A.**, see **M.B. Brown** (3) 167-174  
**Wolfgang, G.S.**, see **P.A. Games** (1) 41- 52

**Woodward, W.A.** and **A.C. Elliott**, A survey of statistical packages on micro-computers<sup>2</sup> (3) 191-200

**Ziemer, R.F.** and **J.-P. Chavas**, A Stein-rule approach to outlying observations in regression analysis<sup>1</sup> (2) 75- 83
